Summary i have 31 training and 2 commerce ready-made projects.

EMPLOYMENT HISTORY

Junior Front-End Software Engineer at Host4Biz, Remote
January 2020 — May 2020

I've been worked on:

1. Connection of Ukrainian localization;
2. Translating the site of the supplier into Ukrainian (worked with OctoberCMS interface and the code. HTML + CSS + eJS + GIT). Rewrite all site files, re-layout, modules rebuild;
3. Layout an adaptive eMail template from scratch. Made on tables, HTML4 and used inline styles. Its works cross-browser, adaptively, plus on the most popular mail clients like a Gmail, Outlook, Bat, Mailspring, Thunderbird, other. Optimized to the spam filters any mail services. I also rewrote and changed the layout of all the email templates for the billing manager system for three language locales(UK, RU, EN). html4 + css2 + (eJS);

Sales manager at "Joiner's products", Chernivtsi
July 2017 — September 2019

I got a job, knowing almost nothing about wood and about work with wood.

- Work with customers:

1. Sale of available products.
2. Consultation on carrying out work with a tree.
3. In some cases development of drawings if detail is required.
4. Reception, modeling and calculation of orders for the manufacture of wood products, individual orders (lumber, furniture, decor, etc.).

- In addition, I took responsibility: Extra store arrangement; organization of providing logistic services to clients; hiring and interviewing workers for carpentry workshops, developing a "encouragement - punishment" system and safety documentation for them; I have organized the work of employees to provide additional services for restoration, repair and installation of products, as an additional option.
